

CLASSROOM AIDES AND TEACHERS

Procedures:

- A. Classroom aides and teachers function differently in their interactions with students. Unlike One to One Aides and non instructional staff, they will have the opportunity, and the possible necessity, of interacting with more than one student during the classroom day.
- B. As a result they need to always stay mindful of the fact that they are potential sources of cross contamination.
- C. Therefore they need to sanitize their hands before, and after, interacting within a student's designated classroom work space
- D. They also need to sanitize their hands before and after handling all educational materials that may be used by others, whether presently, or in the future.
- E. Classroom aides and teachers must wear a mask throughout the school building. A mask is not required to be worn when outside if fully vaccinated.
